For Startups & SMBs

Budget-Friendly │ Monthly Billing

Why ISO 27001 Compliance is Essential for your Business?

In today's digital landscape, cybersecurity threats are on the rise, and adherence to security standards like ISO 27001 is more crucial than ever. ISO 27001 certification demonstrates your commitment to protecting sensitive data, ensuring business continuity, and building trust with customers and stakeholders.

However, maintaining compliance can be complex, time-consuming, and expensive—especially for SMBs and startups.

Our Budget-Friendly ISO 27001 Managed Services

We take care of the entire ISO 27001 compliance process, allowing you to focus on growing your business while we ensure your Information Security Management System (ISMS) always meets compliance requirements.

Unlike traditional consulting models with large upfront costs, we offer a flexible, affordable service that spreads the cost over manageable monthly payments.

Key Advantages of our Managed Services Model

Cost-Effective & Predictable Pricing

Avoid large, one-time compliance expenses with our convenient monthly billing model, making ISO 27001 certification affordable for SMBs and startups.

Continuous Compliance & Certification Maintenance

We don't just help you achieve certification; we ensure your ISMS remains compliant year-round, preparing you for surveillance audits effortlessly.

Expert-Led Compliance Management

Our team of ISO 27001 specialists handle everything from risk assessments, policy documentation, internal audits, and security awareness training to corrective actions and continual improvements.

Reduced Internal Workload

Free up your internal resources by outsourcing compliance management to experienced professionals, ensuring minimal disruption to your daily operations.

Improved Security Posture

Strengthen your cybersecurity framework by proactively addressing vulnerabilities, ensuring robust security controls, and mitigating risks effectively.

Scalable & Tailored for SMBs & Startups

Whether you are a growing startup or an established SMB, our service adapts to your needs, providing exactly the level of support you require.

Our Approach

We take on the responsibility of maintaining compliance, ensuring continuous improvement, and handling all necessary activities to keep your ISMS effective and audit-ready.

Assessment & Onboarding

We begin by understanding your existing ISMS framework, identifying compliance gaps, and mapping out a tailored plan for maintaining certification and improving security posture.

Ongoing Management & Maintenance

We manage all periodic security assessments, internal audits, risk evaluations, and documentation updates to ensure ongoing compliance and audit readiness.

Continuous Monitoring & Improvement

We proactively monitor security controls, assess risks, and implement corrective measures to align with evolving threats and regulatory updates.

Audit Preparation & Support

We ensure seamless preparation for surveillance and recertification audits, providing documentation, evidence collection, and direct support in dealing with auditors.

Why Choose Us?

Proven expertise in ISO 27001 compliance & cybersecurity

Affordable & flexible pricing models tailored for SMBs

End-to-end compliance management with minimal effort from your side
