

Anytime access to your archived messages for cost-effective compliance and e-discovery.

2.7+ billion emails are sent and received daily, and the number is growing. Securely archiving emails enables this vital corporate data to be easily searched - but not changed or deleted. Libraesva Resilient Archive technology stores every email in highly secure, digitally signed archives built for blazing fast search and e-discovery across distributed, multi-volume storage for high availability and redundancy.

COMPLY WITH REGULATIONS

Comply with industry regulations and data protection legislation including GDPR, CCPA, SOX and HIPAA, ensuring email communications are kept unaltered for as long as required with customizable retention rules.

- Comprehensive audit trail shows every access made to archived data
- Privacy officer role controls all access to sensitive data, and granular user access permissions allow configurable, role-based access for your team
- Certified time-stamping of every archived email (RFC 3161), AES 256 encryption and tamper-proof archives guarantee robust security

BOOST PRODUCTIVITY

Give users the ability to find lost or deleted emails and enable admins to rapidly search across mailboxes. Free up user mailbox space, avoid hitting storage quotas and increase mailbox performance.

- Easily find the emails you need with ultra fast, full text search and advanced search across email meta data (including subject, to, from, Cc) and attachment filenames
- Seamlessly access archived email from your familiar email client and mobile devices, with an Outlook add-in, Android and iOS apps, or a Web app
- Navigate and view emails within the original mailbox folder structure
- Save and reuse searches, and share with other users
- Manage another mailbox with user impersonation and mailbox delegation permissions

- ☑ **Digitally signed** RFC 3161 timestamp & AES 256 encryption
- ☑ **Archive and retention** rules put you in control
- ☑ **Fast, powerful search** millions of messages in milliseconds
- ☑ **e-Discovery** to rapidly uncover legal evidence
- ☑ **Mailbox folder** structure retained for easy navigation
- ☑ **Granular user access** with 80+ permissions
- ☑ **Auditing** tracks every access to the archive
- ☑ **Anti-tamper** prevents unauthorized access or changes
- ☑ **Privacy officer** access control to sensitive data
- ☑ **Outlook, mobile and web** user interface
- ☑ **Native connectors** to Microsoft 365, Exchange, Graph, Google, Zimbra
- ☑ **IMAP connector** for additional mail server support
- ☑ **Open standards** ZIP archive format guarantees no lock-in
- ☑ **URL and Antivirus** protection option

SUPPORT E-DISCOVERY AND LITIGATION

Securely preserve an unalterable, real-time copy of every email to minimize risk and be ready for e-Discovery, legal hold and other legal processes should the need arise.

- Rapidly discover and save emails to comply with investigations, company audits and legal hold
- Recover deleted emails to obtain facts and gather evidence
- Produce fully audited email communication trails for faster dispute resolution
- Share saved searches with your legal team and export email evidence as needed

INTEGRATE EASILY

Automatically save an archive copy of every email as it is sent or received for maximum compliance and protection.

- Archive every email in real time with SMTP journaling or near real time with IMAP/POP3 journaling
- Sync user mailboxes (including folders, permissions & delegated access) with native connectors for Microsoft 365, Exchange, Google, Zimbra and more
- Batch import PST, OST, or compressed archives for rapid initial setup
- Export your data anytime without proprietary software – emails are stored in open standards, ZIP archive format to guarantee no customer lock-in

DEPLOY YOUR WAY

Get up and running in minutes – you choose the IT environment, archive location(s), availability, and redundancy options you need.

- Available for cloud, on-prem and popular hypervisor platforms
- Choose how and where your archive data is hosted, with distributed, multi-volume storage providing high availability and redundancy
- Store archives across Libraesva cloud, Amazon S3, Microsoft Azure, Wasabi, local disks, network storage and more
